## PROFESSIONAL SUMMARY

Aspiring Data Analyst / Data Science Intern with a strong foundation in Python, SQL, Machine Learning, and Data Visualization. Experienced in building predictive models, performing exploratory data analysis, feature engineering, and creating interactive dashboards using Tableau. Skilled in solving business problems using data-driven insights with a focus on analytics, reporting, and model evaluation.

## TECHNICAL SKILLS

Programming: Python, Java, SQL

Data Science: Machine Learning, Data Analysis, Feature Engineering, Model Evaluation, EDA

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Visualization: Tableau, Power BI (Basic)

Tools: Git, GitHub, MySQL, Google Colab

## PROJECTS

### Credit Card Delinquency Prediction

- Built a machine learning model to predict credit card delinquency/default risk using customer payment history and behavioral data.
- Performed data cleaning, EDA, feature engineering, and outlier treatment.
- Evaluated models using Accuracy, Precision, Recall, F1-score, and ROC-AUC.
- Created an interactive Tableau dashboard and presentation for business insights.

### Customer Churn Prediction System

- Developed an ML classification model to predict customer churn using customer behavior data.
- Performed preprocessing, feature selection, and model tuning to improve accuracy.

## EDUCATION

**B.Tech, Computer Science & Engineering** – Vardhaman College of Engineering (2024–2028)

CGPA: 9.45

Intermediate – 96.1%

ICSE – 93%

## CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Forage
- Tata Data Visualization / Data Analytics Virtual Experience – Forage
- AICTE / Internship-based Data Analytics Learning Projects
