

# ERAKA ANUSHA

Hyderabad, India | +91 9063275255 | anushaeraka@gmail.com  
GitHub: github.com/Anusha-2006-16 | LinkedIn: linkedin.com/in/eraka-anusha-4817a4329

## PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Excel, SQL, Power BI, Python, and Machine Learning. Skilled in data cleaning, exploratory data analysis, dashboard development, and generating business insights from real-world datasets. Experienced in creating interactive dashboards and analyzing customer and sales trends.

## TECHNICAL SKILLS

|               |                                                                                 |
|---------------|---------------------------------------------------------------------------------|
| Data Analysis | Excel, Power BI, Tableau                                                        |
| Database      | SQL, MySQL                                                                      |
| Programming   | Python, Java                                                                    |
| Libraries     | Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn                                |
| Core Skills   | EDA, Data Cleaning, Data Visualization, Dashboard Development, Machine Learning |
| Tools         | Git, GitHub, Google Colab                                                       |

## PROJECTS

### E-Commerce Sales & Delivery Analysis | Excel, SQL, Power BI

- Developed an end-to-end retail analytics project using 3000+ records to analyze sales trends, delivery performance, and customer behavior.
- Performed data cleaning and transformation in Excel including handling missing values and creating calculated fields.
- Used SQL for shipping delay analysis, customer segmentation, and product performance analysis.
- Built interactive Power BI dashboards with KPIs, sales trends, and regional insights.

### Credit Card Delinquency Prediction | Python, Machine Learning, Tableau

- Built a machine learning model to predict delinquency risk using customer payment behavior data.
- Performed EDA, preprocessing, feature engineering, and model evaluation using ROC-AUC and F1-score.

### Customer Churn Prediction System | Python, Machine Learning

- Developed a classification model to predict customer churn using behavioral and transactional data.
- Performed feature selection, preprocessing, and model evaluation to improve prediction accuracy.

## EDUCATION

### B.Tech – Computer Science & Engineering

Vardhaman College of Engineering (2024–2028) | CGPA: 9.45  
Intermediate – 96.1% | ICSE – 93%

## CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Forage
- Tata Data Visualization / Data Analytics Virtual Experience – Forage
- AICTE Internship-based Data Analytics Learning Projects
